

MONTEL®
The Intelligent Use of Space

Storage Solutions

FOR HOSPITALS AND HEALTH CARE FACILITIES

Montel storage systems are specifically designed to perfectly meet the precise requirements encountered in the various environments of a modern hospital: radiology, administrative and medical records, library, labs, pharmacies, stockrooms, etc.

Because they provide a unique and complete multi-usage storage solution, Montel's high-density storage systems contribute directly to the reduction of storage-related costs, create new space availability inside existing facilities and increase storage and the overall efficiency of records management. Montel also has various secured locking systems meeting today's HIPAA regulations.

MONTEL

Multi-Usage High-Density Storage Systems

- Administration
- Archives
- X-Ray Films
- Medical Library
- Operating Room

PHARMACY, DENTAL CLINIC AND MEDICAL LABORATORIES

QuadraMobile Up-Front (Electrical)

Montel's systems can store all types of materials, from bulk items to specialized specimen containers.

STERILE MATERIALS - LINENS AND LAUNDRY - PERSONAL EFFECTS

HIPAA

Since April 14, 2003 (April 14, 2004 for small health plans), all health care providers as well as all of their health care business partners must comply with the Health Insurance Portability and Accountability Act of 1996 (HIPAA) regulations.

The goals of the HIPAA Policy are to:

- Protect the privacy of the patient by protecting their data;
- Focus healthcare providers with the importance of security and privacy;
- Create a common set of standards for securing such data, whether on paper or electronically;
- Improve efficiencies within the healthcare industry;
- Require efficiencies and security in the transfer of patient information.

As your HIPAA compliance storage systems specialist, Montel is proactive in understanding your needs in order to help you reach your HIPAA compliancy goals. To improve the access and portability of patient health records while maintaining strict privacy and security, Montel offers a complete line of products for fixed and mobile shelving storage units, cabinets and filing related accessories that meet HIPAA records security requirements. From our PIN code to our mechanical and electro-mechanical locks for controlled access, Montel's team of professional storage specialists is committed to help your organization bring your office up to standards in today's workplace.

SECURITY FEATURES

Montel has various secured locking systems meeting HIPAA regulations for fixed mechanical and electrical system.

eMC² Electrical Digikeypad PIN Code Controlled Limit Access:
The HIPAA compliant 4-Digit PIN number access provides safety and security to proprietary documents or materials. Offers the possibility to lock unauthorized aisle(s) to specific department(s) or employees. Different departments or employees can have different PIN numbers allowing access to specific ranges only. This feature is a cost efficient and effective way to prevent unauthorized eyes.
