Remediation of Damage - from Fire, Water & Mould

1

WATER DAMAGED FILES CAN BE RESTORED

We utilize a variety of techniques based on the type of damage and the degree of exposure.

Our **Thermal Vacuum Freeze Dryer**, the only one in Western Canada, uses controlled heat and negative vacuum pressure to safely remove all moisture in the form of a gas through sublimation, from books, documents, photographs, art, and other porous materials affected by water and/or moisture.

The First 72 Hours Are Critical! When disaster strikes, be prepared! Contact Interior Vault now to learn what you need to do to create the best possible outcomes for your important files.

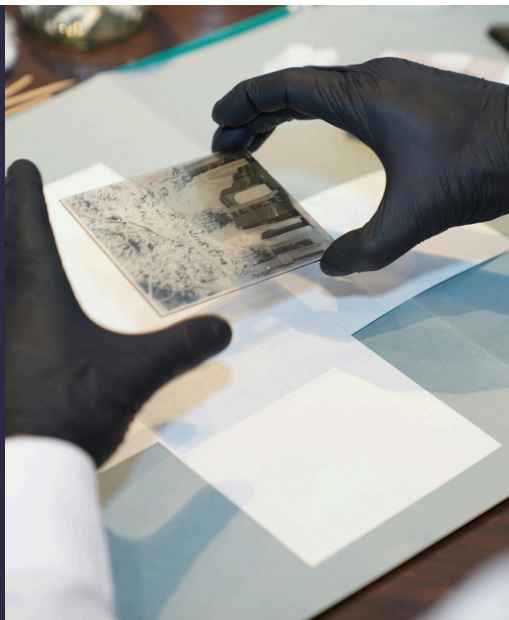

WE RESTORE

Audio tapes, blueprints, books, data files, documents, drawings, files, film, library materials, magazines, magnetic media, manuscripts, maps, microfiche, microfilm, negatives, paintings, parchment, photographs, plans, slides, transparencies, vellum, video tapes, vital records, whiteprints, x-rays...

INTERIOR VAULT DOCUMENT RESTORATION
